

**COVID-19 County Data & Updates:**

**A. CASES:**

Count type	# of cases	date range
Weekend case count:	11  *19 was confirmed for last weekend – no new cases were added after Opera was down the previous Sunday.	Sept 24 - 26
7 -day case count:	44 *Reduced by half vs. last week (90 last week)	Sept 19 – Sept 25
14-day case count:	134  *Reminder of previous risk level framework for 2-week metrics: Less than 30 = Lower, 30-44 = Moderate, 45 -59 = High 60+ = Extreme	Sept 12 – Sept 25
Month to date:	374  (Unvaccinated: 237 vaccinated: 79; unknown: 58*)	Sept 1 – Sept 26
Total:	1,861	March 2020 – Sept 26

- \*Unknown - the vaccination record is not in Oregon's immunization registry (ALERT), and they may have been vaccinated outside of Oregon.
- Note: vaccine status is obtained through ALERT and self-reporting of cases during case investigation and is then used to determine an estimate of breakthrough rate %.

**OHA Breakthrough rate: During the week of Sept 12 – Sept 18**  
**76.8% of new COVID-19 cases were not vaccinated vs. 23.2% were vaccine breakthrough cases (statewide).** Link to data [here](#).

**[County month of September]: 75% not vaccinated vs. 25% vaccine breakthrough cases for Tillamook County (calculated internally).**

What causes a vaccine breakthrough case to occur is a multitude of factors including an individual's immune system and viral load (amount of virus that is in your body). If an individual who is vaccinated already had a lowered immune system, their body may not be able to fight off the virus as effectively, compared to someone who has a strong immune system is also vaccinated.

**B. DISEASE SEVERITY: Seeing an increase in severity**

Type:	Number & Percentages
Deaths	<p>Confirmed deaths: 23 – 20 confirmed not vaccinated, 1 no vaccine record, 2 fully vaccinated.</p> <ul style="list-style-type: none"> <li>The COVID-19 related death peak predicted by OHSU was this past weekend, (9/26) now in a hopeful decline.</li> <li>Deaths that are determined to be related to COVID-19 need to meet criteria listed in the Oregon Health Authority “COVID-19 Investigative Guidelines” available on Oregon Health Authority’s COVID-19 page under “investigative guidelines” section 7.</li> </ul> <p><i>With our community, we grieve for every life lost wish to extend our sincerest condolences at this difficult time</i></p>
Hospitalizations	77 – no new hospitalizations reported in the 7-day period.
Test positivity rate (OHA)	<p>7.5% (Sept 19 – Sept 25) – decreased! was 11.2% the previous 7-day period. Link to data <a href="#">here</a></p> <p>Previous Risk level test positivity rates:                      Less than 5% = lower                      5-less than 8% = Moderate                      8% - less than 10% High                      10% + = Extreme</p>
Active Outbreaks	<p>15 confirmed outbreaks, 10 pending investigation = 25 total under monitoring.</p> <p>Our public health team continues to perform case investigation and interviewing to determine any linkage amongst cases. Due to influx of cases and staff shortages, our public health team is behind on case investigation but is working hard to get caught up and will continue to update and monitor for outbreaks.</p>
<a href="#">Adult ICU beds region 1</a> (OHA)	366 beds total – 342 occupied, 24 available as of Sept 24 (93.44% occupied, was 91.48% last week)

[Adult non-ICU beds region 1 \(OHA\)](#)

1896  
beds total – 1838 occupied, 60 available as of Sept 20 (96.84% occupied, was 96.57% last week)

**C. Treatments for COVID-19:**

As cases of COVID-19 continue to increase and disease severity (hospitalizations and death) in our community, many may be feeling scared and uncertain.

There is a lot of information available to us about COVID-19, but not all of it is reliable, accurate or trustworthy. Using non-reliable sources of information can lead to an increase in harm to yourself and potentially others.

There has been an increase trend in the use of Ivermectin to treat or prevent COVID-19. Oregon Health Authority reported 5 hospitalizations over the weekend. This is not a safe or proven treatment and may cause serious harm when misused.

Ivermectin is approved by the U.S. Food and Drug Administration to treat certain **infections caused by parasites**, it has not been proven to prevent or treat COVID-19. The disease COVID-19 is caused by a virus (SARS-COV-2 virus) not a parasite.

Do not swallow ivermectin products that should be used on skin (e.g., lotions and creams) or are not meant for human use, such as veterinary ivermectin products.

Seek immediate medical attention or call the poison control center hotline (1-800-222-1222) for advice if you have taken ivermectin or a product that contains ivermectin and are having symptoms of ivermectin toxicity, which include the following: Nausea, vomiting, abdominal pain, diarrhea, headache, blurred vision, dizziness, increased heart rate (tachycardia), low blood pressure (hypotension), visual hallucinations, altered mental status, confusion, loss of coordination and balance, central nervous system depression and seizures.

**There is safe treatment for COVID-19 available in Tillamook County; Monoclonal antibody therapy (Regeneron [brand-name])**

Monoclonal antibodies are like your body’s own antibodies as they help your immune system quickly destroy the COVID-19 virus before it harms you or causes hospitalization. Fortunately, the U.S. Food and Drug Administration has authorized monoclonal antibody treatment for emergency use for eligible patients.

If you test positive for COVID-19 or have symptoms, talk to a healthcare provider right away. Monoclonal antibody treatment must be given as soon as possible within 10

days of getting a symptom. These treatments require a provider referral after a positive COVID-19 test. The treatment is given through a one-time IV infusion currently at Adventist Health, Tillamook hospital.

#### D. **DELTA VARIANT TRACKING:**

As of September 18th, Oregon Health Authority [Oregon COVID-19 Variant Count](#) shows 4,493 delta variant cases have been tracked in Oregon and 766 in region 1 (Clackamas, Clatsop, Multnomah, Tillamook, and Washington counties). County level data is not available. Oregon Health Authority notes that nearly all of the new COVID-19 cases have been from the delta variant. The delta variant is three times more transmissible than earlier strains of the virus, both young and older individuals are getting sick and increasing disease spread.

#### E. **Face Covering and Masks:**

- **Reminder** masks are required in all public indoor spaces and outdoors when physical distancing is not possible. OHA strongly encourages masks at private residences when gathering with others outside of your immediate household.
- **Tillamook County Public health strongly urges individuals to follow all mask requirements.**
- In addition, due to continued outbreaks, Tillamook County Public Health recommends that individuals take the following precautions to reduce and limit the spread of COVID-19:
  - Wear a mask properly (over mouth and nose).
  - Keep 6ft of distance from those not in your immediate household,
  - Wash your hands frequently,
  - Make a plan to get a COVID-19 vaccine as soon as possible, if eligible and not yet vaccinated.

#### F. **TESTING:**

**Volume:** On average ~50 individuals were tested on each of the three testing days throughout the week last week at the drive-up COVID-19 testing clinic

(Monday: 70, Wednesday: 38, Friday: 47)

previous was 65 per each day of operation which was 3 days (190 avg).

**Drive-up testing will change hours in October.**

From Oct 2<sup>nd</sup> – Oct 18<sup>th</sup>: 8:30am – 3pm, Monday, Wednesday, and Friday at Tillamook County Fairgrounds. Entrance and Exit will be on 3<sup>rd</sup> street at the main gate by the convention center (no longer using 4-H dorms gate as entrance).

From Oct 18<sup>th</sup> – Oct 31<sup>st</sup> – 8:30am – 12pm, Monday, Wednesday and Friday using 3<sup>rd</sup> St. main convention center gate as entrance and exit.

No appointments are required for drive-up testing; **however**, this drive-up testing clinic is **only** for those who are **currently with symptoms** consistent with COVID-19 (such as fever, dry cough, fatigue, muscle aches, sore throat, or congestion) and those who have been exposed to someone who tested positive (**close contact**). **Due to high demand testing is being prioritized and is not available for surgery, travel, work, school, sport etc. purposes.** COVID-19 testing is available at no charge.

**Other sites for testing of for symptomatic individuals and close contacts:**

- **Tillamook County Health Center:**

- 8<sup>th</sup> St. Acute Care Clinic (sick visits & testing):

- Tuesday and Thursday 8am -4:30pm – Appointment are required:  
503-842-3900

- **Adventist Health Urgent Care – Tillamook**

- **Rinehart Clinic – (Director at Rinehart can speak to their availability and process)**

**Questions: Public Health Nurse line** (for COVID-19 symptom, quarantine, and testing questions): **503-842-3940** (messages returned within next business day).

**Home Tests - If you are unable to get tested, and you are symptomatic, you may want to use a home test from a pharmacy.** (Supplies seem to be limited) Follow the instructions on the kit. If you have a positive result, guidance for positive home test is available on our website on our COVID-19 testing page.

As mentioned, people are taking these tests and the results are not included in this report.

**G. EVENTS & GATHERINGS:** There is no mandate to cancel events.

**Please do consider these Public Health Recommends:**

1. **Reschedule or postpone any events, gatherings, or celebrations.** If you must hold an event, follow the CDC guidance for modifying your event and using CDC precautions.

2. **If you are unvaccinated, you should not attend these events, celebrations, or gatherings.** If you do, make sure to wear a mask even in outdoor settings when people are close together.

**Information on Community gatherings and ideas for outdoor gatherings are on our Facebook page and CHC website. Search Tillamook CHC. org.**

**(See, also, Public Health Officer Recommendations.)**

H.

**VACCINE UPDATE:**

VACCINE #

Type	#	Vaccine rate % eligible  Eligible population = 21,965 (16+)	Vaccine rate % eligible  Eligible population = 23,214 (12+)	Vaccine rate % total population  Total population = 26,530	As of date:
At least one dose	16,726	76.15%	72.05%	63.04%	Sept 27
Fully vaccinated	15,340	69.84%	66.08%	57.82%	Sept 27

**COVID-19 vaccines are the best tool for protecting yourself and those you love against COVID-19& slowing spread.** We have seen an increase in vaccine requests through the month of August and so far in September – 60-70 per clinic day on avg (So total is 120-140 each week avg (open twice per week on Tues/Thurs.)

**1. NEWS:**

[Pfizer BOOSTER]

- o Friday, the Western States Scientific Safety Review Workgroup (WSSSRW) met and accepted the recommendation from the FDA and CDC’s Advisory Committee on Immunization Practices (ACIP) for a booster dose of **PFIZER** to be administered at least 6 months after the second Pfizer does for those who received the Pfizer series if the following criteria is met:
  - People 65 and older
  - People living in a long-term care facility
  - People 50-64 with underlying medical conditions
  - People ages 18-64 with underlying medical conditions or who are a higher risk of exposure to the COVID-19 virus due to where they live or work, such as teachers, grocery workers and people who live in congregate care settings.
  
- Booster doses have not been recommended for people who received the Moderna or Johnson & Johnson vaccine. Vaccine manufacture may not be changed for additional doses once the initial covid vaccine has been administered.

- It is expected that federal officials will consider booster doses for people who've received these vaccines in coming weeks.

**Reminder that healthcare workers, school educators and staff and state employees must be fully vaccinated by October 18<sup>th</sup> unless have a religious or medical exemption.**

Fully vaccinated is 2 weeks after the completion of a 2-dose series or 2 weeks after receiving a single dose vaccine such as Johnson & Johnson. In order to meet this requirement, here are the dates for each vaccine:

- Moderna: 1<sup>st</sup> dose by: Sept. 6<sup>th</sup>; 2<sup>nd</sup> dose by: Oct 4<sup>th</sup>
- Pfizer/ Comirnaty 1<sup>st</sup> dose by Sept. 13<sup>th</sup>; 2<sup>nd</sup> dose by Oct 4<sup>th</sup>
- **Johnson & Johnson: Single dose by Oct 4<sup>th</sup>**

**\*\*\*\*For someone choosing to get vaccinated for the 1<sup>st</sup> time, Johnson and Johnson would allow you to meet the criteria for fully vaccinated by October 18<sup>th</sup>. Please talk with your healthcare provider if you have questions about which vaccine is best for you.**

[3<sup>rd</sup> Dose]

- The additional dose, called a “3<sup>rd</sup> Dose” is a separate recommendation for people who have moderately to severely compromised immune systems as defined by the CDC is currently available to those who it is authorized for, and is separate from what is considered a “booster”. A list of these conditions from the CDC is available on our website.

**September & October- Vaccine Appointments:**

**(1) Tillamook County Community Health Center Fairgrounds Convention Center.**

- From Oct. 1 – Oct 17<sup>th</sup>: All three COVID-19 vaccines available on Tuesday and Thursdays 8:30am – 3pm. Drop-in only.**
- From Oct 18<sup>th</sup> – October 31<sup>st</sup>: : All three COVID-19 vaccines available on Tuesday and Thursdays 8:30am – 3pm and Wednesday from 1pm – 4pm. Drop-in only.**

Starting later in October flu and pneumonia shots will be available along with COVID-19 vaccines the fairgrounds Convention Center. The CDC advises that the flu and covid vaccine may be administered in the same day.

c. Upcoming special event:

- 10/15/21 - Partnering with YMCA to attend Tillamook High School's homecoming event and offer COVID and flu vaccine prior to kick-off.
- 10/23/21 - 10am-2pm. National DEA Drug Takeback Day this year will be at the fairgrounds. We will also be offering flu and COVID vaccine. More information coming soon.

**(2) Adventist Health:**

- 1) **Tillamook @ Occupational Medicine office**
- 2) **Pacific City on Wednesdays**

**A. Rinehart Clinic in North County**

**B. Local Pharmacies** – Safeway, Fred Meyer, and Tillamook Pharmacy

**C. Statewide Pharmacies** – check websites to schedule appointments.
